Survey Device: Speed Monitoring and Notification Device (SMND) # 1129

Survey Operator: Lt. Ethan Moffitt # L-58

Device Location: Woodmark Run at Waybaugh Drive

Device Direction: Facing eastbound traffic (approaching N. Stygler Road)

Speed Limit: 25 MPH

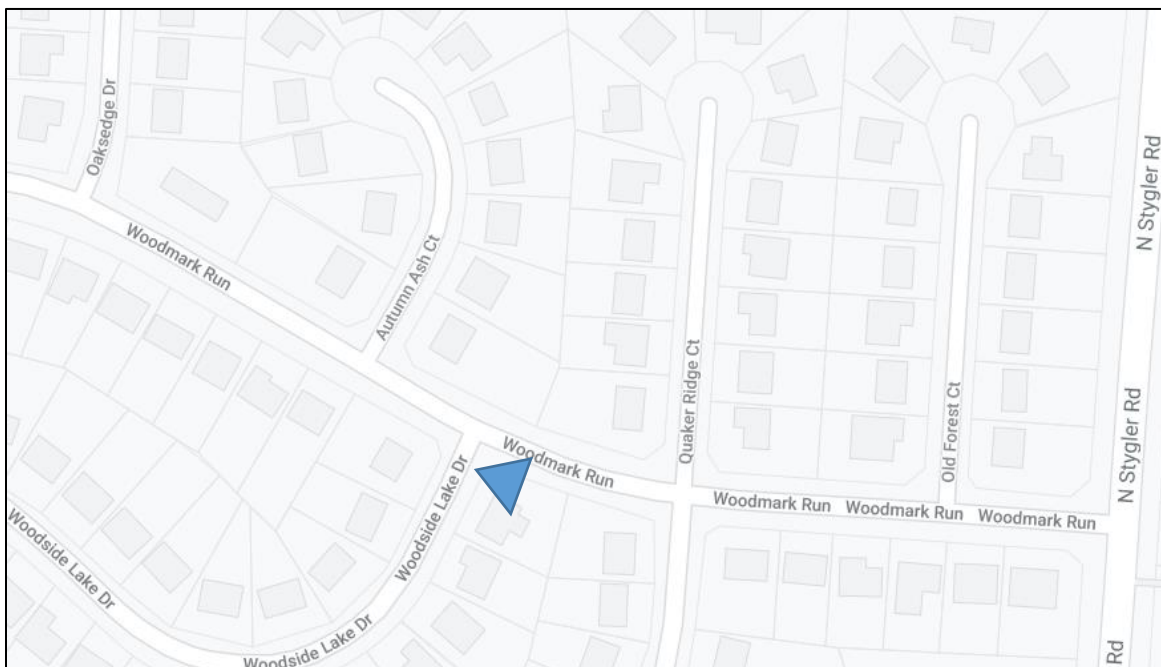

Survey Dates: 04-30-21 to 05-22-21

Survey Reason: Known high-speed residential traffic zone (prior neighborhood complaints)

Summary –

On 04-30-21, SMND # 1129 was deployed on Woodmark Run, a location associated with previous community reports of excessive speed. The device was deployed in order to provide a continuous speed mitigation presence. The SMND recorded the speed of 34,937 vehicles (combined eastbound and westbound traffic). Of those, 9868 or 29%, were traveling in excessive of the posted speed limit and 25,069, or 71%, were traveling below the speed limit. The average speed was 21.2 MPH. The 85th percentile speed was 28 MPH, meaning that 85% of the vehicles were traveling at a speed of 28 MPH or less.

Three hundred and fifty-one vehicles were traveling in excess of 35 MPH, accounting for 1% of the total count (34,937) and 3.5% of the over-limit count (9868). Conversely, more than 96% of vehicles traveling above the speed limit were going between 26 and 35 MPH. The survey results demonstrate that the presence of the SMND was an effective mitigation measure. There was substantial compliance with the posted speed limit during the deployment period and few excessive speed violations.

Survey Report Quick Guide/Reference

Over Threshold Count

The default threshold (amount over the posted speed limit) is 10 MPH. The **Over Threshold Count** is the number of vehicles traveling in excess of the selected threshold. For example, if the threshold is set at the 10 MPH default, this would indicate the number of vehicles (within the Total Volume) that were traveling at 10 MPH over the posted limited.

Count vs. Time

The **Count vs Time Chart** shows the number of vehicles per unit of time traveling on the monitored roadway.

Weekly Count vs. Time Chart

The **Weekly Count vs. Time Chart** mode shows the vehicle count per day over a 7-day period. If the survey period extends beyond one 7- day week, the values of each overlapped week day will be the average values for those overlapped week days.

Count vs. Speed Chart

The **Count vs. Speed Chart** selection shows the total vehicle count for each speed group. The size of the speed group can be set by the operator (**Speed Resolution** selection in the **Analysis Control**).

Percentile Chart

The **Percentile Chart** shows the cumulative percentage of vehicles that are at or below a given speed

Average Speed vs. Time Chart

The **Average Speed vs. Time Chart** shows the average and the 85th Percentile Speeds of the vehicles over time.

Speed vs. Time Bubble Chart

The **Speed vs. Time Bubble Chart** plots both vehicle speed and volume against time. The size of the bubble represents the number of cars at a particular speed group at a particular time. This chart is useful in showing traffic bunching.

Average Speed

The average speed of all vehicles

85Speed Percentile

The speed at which 85% of the traffic was traveling **at or less than**. The 85th percentile is considered to be a key metric because it is generally considered to representative of prevailing traffic conditions (the speed vehicles on the roadway are going most of the time).
